

Press Release

The New 'Silent Service'

Offshore Work-at-Height without the safety drawbacks

For nearly 20 years IRATA International Rope Access has brought a new quality of non-invasive, non-disruptive work (ask!) solution to tasks involving activity at height or in areas of difficult access. IRATA International has member companies in every continent (ask!) and has more than 12000 trained rope technicians registered in over 50 countries. Its member companies are enjoying their highest-ever levels of deployment, both onshore and offshore. *Rope access is all around you.....but quietly!*

Those who contract work-at-height are becoming increasingly concerned with matters of air and noise pollution, traffic and pedestrian disruption, risk of public injury or closures of important thoroughfare (ask!). Rope access offers the simple solution, and offers an unrivalled record of safe working(ask!).

The prized 'minimal environmental footprint' is delivered by IRATA teams on many of Britain's most iconic structures (ask!) but is just as likely to be found cleaning, repairing, inspecting and maintaining your local shopping complex or high-rise office block. Its companies deliver well-trained and supervised experts(ask!), working to proven Guidelines(ask!), and do so in as near to silence as is possible. The people working in the buildings we service often do not know we are there, such is the lack of disruption caused.

For the information you need to work with the fastest growing work process in the work-at-height sector contact:

Roderick Dymott, Chief Executive Officer 01276 857844 irata@rod.org.uk

Wendy Cooles, Administration Manager 01252 357839 info@irata.org

Write to: IRATA International, Tournai Hall, Evelyn Woods Road, Aldershot, GU11 2LL

Visit: www.irata.org

(ask!) – call us with your questions on these and other work-at-height issues
