

CAN OFFSHORE LTD

Project Engineer – Trades

(Ref: 6B284WEB)

Working within our Trades Division, with responsibility for trades based projects the successful candidate will have experience in a rope access environment coupled with a working knowledge of mechanical/trades activities. IRATA Rope Access would be an advantage.

Duties include:

- Ensure that all projects are set-up well, organised, run and supported properly so that they operate safely and smoothly in accordance with company procedures and processes.
- Co-ordinate briefings and movements of allocated field personnel to ensure that they have a full understanding of their responsibilities and workscope.
- Ensure field personnel are equipped with all necessary documents and equipment to work efficiently.
- Assist with Operational input to major bids, tenders, quotes, proposals and pre-qualifications.
- Interpret customer workscopes and draw up clear task definition to ensure customer receives correct services.
- Liaise with Warehouse Supervisor over equipment requirements for jobs and ensure equipment movements and losses are monitored.
- Compile and prepare CAN project close out reports and ensure they are satisfactory to client requirements.
- Assist the Accounts Department with preparation of invoices to ensure correct invoicing for work performed.

To apply, please send your CV and covering letter, **quoting the job reference number listed above to: careers@cangroup.net**

THE CLOSING DATE FOR THIS POST IS 27 JANUARY 2010
